

KIRKMAYERTM
CANADA ADVANCED ECA TECHNOLOGY
A Division of Kirkmayer Industries OÜ

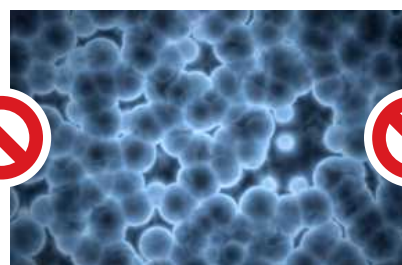

BETTER *than* CLEAN!

- ✓ Reduces mortality rate
- ✓ Reduces medical costs
- ✓ Complete hygiene protocol without chemicals
- ✓ Better weight gain at all cycles of pig growing
- ✓ Eliminate the costs and hazards of chemical disinfectants

**Proactive Prevention of Pathogens:
Restoring Confidence One Farm at a Time**

Deploying **Kirkmayer® Anolyte** in animal feed, water consumption, spraying and fogging of barns and equipment will **significantly reduce** death rates, reduce use of antibiotics and other medicines as well as reducing livestock stress levels, thus keeping the animals' health at their optimum best.

Unsurpassed Disinfection and Sterilization results!

Proactive Prevention of Pathogens

**Say goodbye to chlorine and hello to
Kirkmayer® Anolyte**

**Cleaning, Disinfecting and Sterilizing Generators
that eliminate monthly chemical cost outlay**

Just like humans, hogs consume water. Water is a critical component, and it is considered to be the most important nutrient for hogs. **Like humans, hogs require good health and wellness.** Generally the common perception about water is that "Water is Water". However, while water that is consumed by humans is generally treated with a process in which certain elements of water are removed to ensure its safety, cleanliness or palatability; water provided to hogs is seldom treated. **The importance of water quality is a vital concern** in the production and health of hogs. Adding **Kirkmayer® Anolyte** to the drinking water kills bacteria, viruses, germs and many other harmful pathogens such as e-coli

Natural **DISINFECTANT**

Kirkmayer® Anolyte is a safe, effective and inexpensive alternative to growth promoter antibiotics, disinfectants and sanitizers used in the swine industry.

Drinking Water

Kirkmayer® Anolyte Applications

Udder & Skin Treatment

Feed Disinfection

Outerwear and Equipment

Tail Cutting

ANOLYTE

POWERED BY

KIRKMAYER®

Leaders in Electrolyzed Water Technology and System Design

Kirkmayer® Anolyte is the best way to protect the health of your animals. It is an all-natural antibacterial/antimicrobial solution that effectively controls a broad spectrum of harmful pathogens.

KILLS more than 99.99% of bacteria, viruses & germs such as:

Staphylococcus aureus (MRSA) • Salmonella enterica
Pseudomonas aeruginosa • Porcine Epidemic Diarrhea virus (PED)
Actinobacillus pleuropneumoniae • E. coli

Kirkmayer® Anolyte (Electrolyzed Water) is raising the bar in cleaning and disinfecting! This novel technology is reaching new heights and setting new standards. It is green, clean and it works! With Electrolyzed Water case studies and testimonials from multiple industries worldwide, it is becoming the disinfectant of choice. **Supportive information is available upon request.**

What is Kirkmayer® Anolyte

- ✓ An antimicrobial solution formed from naturally occurring elements
- ✓ Attacks an array of microbial organisms including bacteria, viruses, and microbial spores. This process is chemically selective with no side effects for higher forms of life.
- ✓ Environmentally conscious solution which controls a broad spectrum of harmful pathogens and difficult-to-kill biofilms
- ✓ A powerful antimicrobial solution that is both biodegradable and non-accumulative. The key active ingredient, Hypochlorous acid, is a naturally occurring molecule synthesized from an electrolyzed solution of salt and water.
- ✓ A concentrated electro-chemically activated solution, rich in oxygen, in which pathogens such as bacteria and viruses cannot survive
